EXPERIENCE

DXC Technology | Full Stack Web Developer

Bengaluru, India | April 2022 - January 2024

- Frontend Developer at DXC Technology, specializing in Angular framework.
- Proficient in backend development, creating APIs with Spring Boot.
- Collaborated with cross-functional teams to deliver responsive web applications for enhanced user experience.

SKILLS

Programming Languages: C, Java, Python

Libraries/Frameworks: Javascript, Angular, Spring Boot, React

Tools / Platforms: Git, Github, Vs code, Mockoon, Postman, Spring tool suite

Databases: Oracle, MySQL, MongoDB

PROJECTS / OPEN-SOURCE

eProcurement Portal | [Link](#)

Angular, Spring Boot, MySQL, Ionic

At DXC, I contributed to the development of an eProcurement system, focusing on frontend design and backend integration. Our goal was to streamline procurement processes through a user-friendly platform, resulting in improved efficiency and workflow optimization for clients.

Luv2Shop | [Link](#)

HTML5, CSS, Bootstrap 5, JavaScript, Angular, MySQL, Spring Boot

Luv2shop is my independent creation, a robust e-commerce website built from scratch with Angular, Spring Boot, MySQL, and Stripe API integration. Offering seamless user experience, streamlined checkout, and secure payment processing, it provides a comprehensive online shopping solution.

Shopping Time | [Link](#)

React, JavaScript, JSX, CSS

Developed a women-centric e-commerce website using React and JavaScript, featuring responsive design, interactive product views, and seamless checkout functionality.
